

## **ASI P4 - Tactical Information Operations**

**Purpose:** This course is designed to give an individual a working foundation of information operations between the battalion and division level of operations and teach Soldiers, Marines, Sailors, and Airmen to integrate and operate in an informational environment. Each student will gain a working knowledge of Information operations (IO), IO core and supporting elements, IO integration into the military decision making and targeting processes, analyze the informational environment, IO execution, and assess the results. Their knowledge will be exercised and validated during a culminating scenario based exercise, where they will apply their knowledge of information operations at the battalion, brigade, and division level of operations.

**Prerequisites:** Army, USMC, Navy, and Air force Active, Reserve, and National Guard Officers, Warrant Officers and Non-Commissioned Officers (E6 and above), serving in a Battalion, Marine Expeditionary Unit, or higher information operations cell.
